

## **-10 Degrees Beef Freezer Design Criteria**

R448A refrigerant

Room Temperature: -10 degrees

Run Time: 18 hours

Location: Indoors

75 degrees inside ambient temperature with 50% relative humidity

95 degrees outside ambient

**Room Dimensions: 10 x 30 x 10** W-L-H

2000# of Beef

Entering Beef Temperature: +35 degrees

Final Beef Temperature: -10 degrees

Lighting: 1 watt per square foot

1 person

.4 horsepower of motors

Using tables in Heatcraft manual, when there is a range and not a specific number use the average of the range. For example: range is 89-110, use the average of those two which is 99.5
